Push Button Control

Concorde[®] is available in both regular and wide models, with two seat depths to fit people of all shapes and sizes.

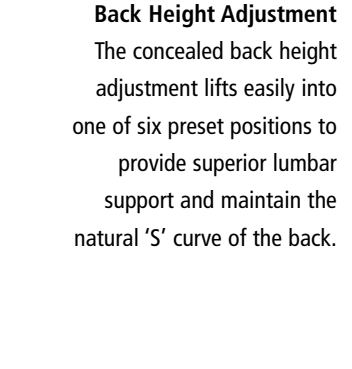

Tilt Lock Adjustment
The first button at the front of the left armrest releases the chair tilt into a free float position that follows the user's movement providing continuous support through a full range of motions. Pushing the button a second time instantly locks the free float into any four fixed positions.

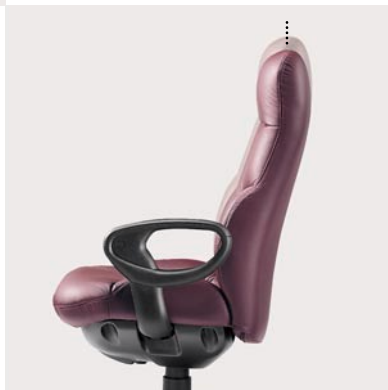

Back Angle Adjustment
The second button at the front of the left armrest releases the back angle into a free float position that follows the user's movement. Pushing the button a second time locks the chair back into a fixed position.

Seat Height Adjustment
The button on the right armrest adjusts the seat height to accommodate the full spectrum of body sizes. This adjustment enables the user to maintain correct posture, minimizing pressure points, improving circulation and ensuring greater comfort for longer periods of time.

Back Height Adjustment
The concealed back height adjustment lifts easily into one of six preset positions to provide superior lumbar support and maintain the natural 'S' curve of the back.

Concorde is an industry 'first', providing push-button control of your seating position from the arm of the chair. Push-button control – the standard in luxury automotive and aircraft seating – is now the new world standard in workplace seating with Concorde. Innovative and unique, Concorde provides state-of-the-art ergonomic seating for management, and offers models for tall/large applications. What makes it unique is Concorde's arm-mounted push-button controls. Press once, and Concorde floats free. Press again, and Concorde locks firmly in position. Exceptional comfort, perfect support and a limited lifetime warranty are yours with Concorde.

Concorde acknowledges the entire spectrum of body types and sizes – tall, short, large, small, plus all the subtle variations in between – with a full range of choices. Two seat widths – regular and wide. Two back heights – low and high. Two seat depths – standard and deep. Adjustable clearance between armrests. Weight capacity rated to 350 lbs. All from Concorde. Only from Global.

Large & Tall

Available in two different depths 16" & 18"

Available in two different widths 19" & 21"

Each Arm Adjusts 1 1/4"

Only from Global

Janet Richardson, Fund Manager (5ft-11in.)

Mike Williams, Defensive End (6ft-7in.)

Management Decisions

Concorde's push-button adjustability ensures comfortable seating for those on both sides of the table, however different they may be in size, shape, even in point of view. Its exceptional quality will provide individual levels of support, meeting after meeting, year after year. Concorde's limited lifetime warranty is Global's commitment to you.

Concorde® ... a step beyond the latest automotive and aircraft technology ... with precision controls at your fingertips.

Conference

The Concorde Office
Supportive seating for desk/computer work ...
relaxed seating for telephone/visitor meetings ...
... instantly adjustable whenever you need to sit up, lean back or stretch.

Comfort & Support

Concorde[®] with Pulsor[™]

Global's successful Concorde executive chairs are now available with the Relaxor PULSOR IV Vibro-Tactile Massage Stress Reduction System. The Pulsor system consists of four independent pulse zones located in the back and thigh areas which help to alleviate back pain and muscle fatigue, reduce stress and improve circulation for increased productivity- all at the push of a button.

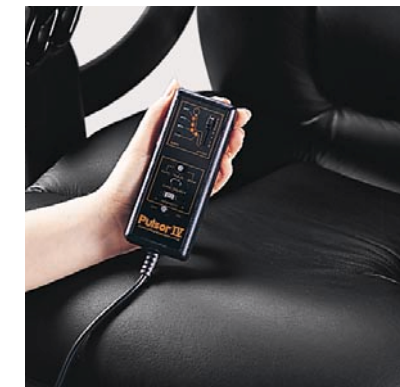

Adjustable
Massage

Eight-motor Vibro-Tactile Massage Stress Reduction System

Stress Reduction System

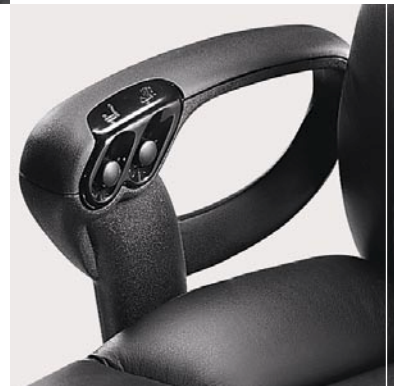

Concorde with Pulsor is seating for management and boardroom applications. Running on either an AC adapter or a rechargeable battery, Concorde with Pulsor can be adjusted to provide a relaxing massage in any one of four zones or be set to alternate from zone to zone. Intensity of massage can be adjusted by a system control wand stored under the chair arm.

Rechargeable Battery
Rechargeable battery slides into the built-in, under seat pocket (AC adapter also included)

Control Wand
A control wand with on/off control allows specific adjustment of the massage type, location and intensity

Control Buttons
Control button turns the massage function on or off. LED lights in the right chair arm illustrate which massage motors are in use

Rechargeable Battery
Rechargeable battery and charger are included with each chair at no extra charge

Heavy-duty pneumatic seat height cylinder

Heavy-duty mechanism, tested to 600,000 cycles

Injection molded glass filled reinforced base tested to 5,000 lbs

Heavy-duty dual-wheel hooded casters

Concorde® 24-HR is an industry ‘first’, providing push-button control of your seating position from the arms of the chair.

Push-button control – the standard in luxury automotive and aircraft seating – is now the new world standard in workplace seating with Concorde 24-HR.

Innovative and unique, Concorde 24-HR provides state-of-the-art ergonomic seating for multi-shift, and offers models for tall/large applications. What makes it unique is Concorde’s arm-mounted push-button controls. Press once, and Concorde 24-HR floats free. Press again, and Concorde 24-HR locks firmly in position. Exceptional comfort, perfect support and a limited lifetime warranty are yours with Concorde.

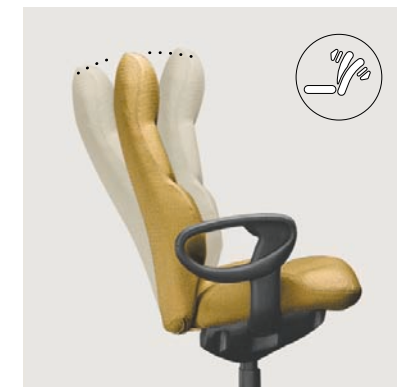

Tilt-Lock Adjustment

The first button at the front of the left armrest releases the chair tilt into a free float position that follows the user’s movement providing continuous support through a full range of motions. Pushing the button a second time instantly locks the free float into a fixed position when the chair is tilted upright.

Back Angle Adjustment

The second button at the front of the left armrest releases the back angle into a free float position that follows the user’s movement. Pushing the button a second time locks the chair back into a fixed position.

Seat Height Adjustment

The button on the right armrest adjusts the seat height to accommodate the full spectrum of body sizes. This adjustment enables the user to maintain correct posture, minimizing pressure points, improving circulation and ensuring greater comfort for longer periods of time.

The Multi-Shift Workplace...

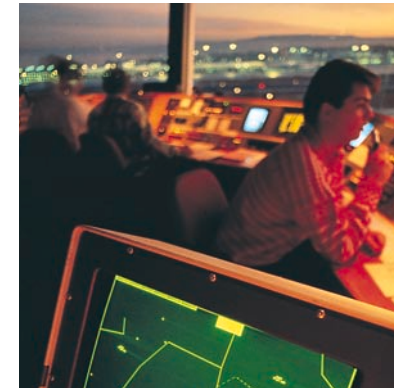

24 hours a day...7 days a week...
365 days a year... *Concorde*[®] 24-HR
is built for the most demanding of
'intensive use' environments.

In today's world, many workplaces must operate around the clock. Concorde 24-HR thrives in these intensely demanding environments. Concorde 24-HR accommodates constantly changing users with seating positions that adjust at the touch of a button according to each individual need for comfort and support. Most importantly, Concorde 24-HR is built for non-stop usage, exceeding ANSI/BIFMA standards ... and backed by a Limited Lifetime Warranty – only from Global.

... health care, air traffic control, emergency dispatch ...
Concorde 24-HR performs!

Lifetime
Limited
Warranty

Air Traffic Control and Transportation Monitoring
Aircraft arrive and depart, shifts follow each other around the clock, and Concorde 24-HR is there to meet the challenge.

Utilities Control and Process Manufacturing
Utilities deliver power non-stop; Concorde 24-HR delivers push button comfort for a lifetime – guaranteed by Global.

Health Care and Institutions
Concorde 24-HR works to keep caregivers comfortable, alert, and ready for any emergency.

Finance, Insurance and Real Estate
The twenty-four hour money market is never-ending action; Concorde 24-HR offers an instantly adjustable oasis of comfort.

Concorde[®] 24-HR is the culmination of more than thirty years of leadership in seating design and development.

Concorde[®] 24-HR is available with two seat depths to fit people of all shapes and sizes.

Research and Development
Global's product designers and manufacturing engineers are supported by the most advanced computer-aided design equipment.

Concorde 24-HR is the natural evolution of more than thirty years of continuous improvement in the design and manufacturing of office seating. Global's long-term investment in research and development is supported by a fully equipped ISO accredited testing facility – one of the very few furniture companies

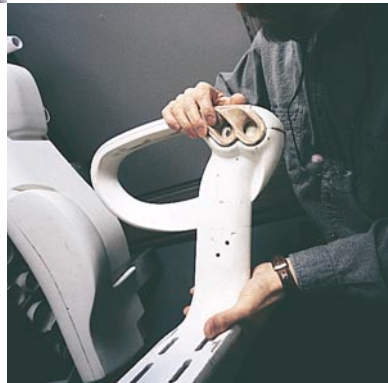

worldwide with technical support of this calibre.

Engineering
Concorde 24-HR has four utility patents related to button-controlled operation and several design registrations pending.

Concorde 24-HR is manufactured in compliance with an ISO 9000 based quality assurance program – an international program of industrial quality standards.

Tooling
Global invests heavily in high-precision tooling to maximize efficiencies, ensure rigid quality control and reduce product costs for its customers.

Testing
The Global testing facility is registered by the Standards Council of Canada to ISO guide 25.

Manufacturing
Global's manufacturing divisions are closely linked and vertically integrated. Global is recognized for its earth-friendly environmental programs and processes.

Concorde 24-HR acknowledges the entire spectrum of body types and sizes plus all the subtle variations in between – with a full range of choices. Two back heights – low and high. Two seat depths – standard and deep. Adjustable clearance between armrests. Weight capacity rated to 350 lbs. All from Concorde 24-HR. Only from Global.
